

Gentlemen of the FCC,
I respectfully urge you to reject the National Association of Broadcasters' petition 04-160. I don't want them to decide what I can hear on satellite radio.

Satellite radio provides me with variety and quality of service not available anywhere else. Also, in my travels I am able to access much more relevant traffic and weather information via satellite without scanning radio stations...something I consider dangerous.

I pay for the service and don't want the NAB to dictate what I can hear.

Thanks for your attention to this matter.
